Cloth mother+baby Stab	149 x	Sb 5	\$5	1900

binding book	210mm			
Peanut Butter Jar			\$1.50	570

Lake Malawi National Park (LMNP) is a UNESCO World Heritage site containing over 1000 species of fish that occur nowhere else in the world. **LMNP** is currently threatened by deforestation and over –fishing. Between 2001- 2009, WWF Finland (World Wide Fund for Nature) supported environmental education, outreach to communities around LMNP and rehabilitation of the LMNP ecosystem. HEEED Malawi a Malawian NGO created by WWF Finland, is carrying on the same goals: to foster the health of this unique Park, as well as the surrounding communities by providing them with economic opportunities including aquaculture, agriculture and fuel briquettes.

In addition, HEEED- Malawi is promoting tourism through snorkeling activities and the sale of products from HEEED Handicrafts, including hand- made paper cards, books, photo-albums, sisal baskets, banana stem plates and cane furniture. Income derived from the sale of these products assists the health, education and economic development of orphans in Chembe Village. Please place your order from the products listed above. Materials used in paper-making include waste paper, sisal, corn stalks, tea- bags, banana stem, onion skin and baobab flowers.
